PROFESSIONAL SUMMARY

Backend Engineer with 4+ years of experience architecting scalable systems and high-performance distributed APIs. Specialized in the Node.js (NestJS), Java Spring Boot, Go, and ASP.NET Core ecosystems, with deep expertise in PostgreSQL, domain-driven architectures, and cloud-native GCP deployments. Proven track record of optimizing API latencies for high-volume telco analytics platforms and driving the rapid delivery of SaaS and marketplace MVPs. Seeking Senior Backend or Technical Lead roles to champion architectural excellence and build highly resilient products.

EDUCATION

University of Muhammadiyah Prof. Dr. Hamka | Aug 2019 - Jul 2023
Bachelor of Engineering in Software Engineering | GPA 3.69 / 4.00

CORE TECHNICAL SKILLS

- **Programming Languages:** TypeScript, JavaScript, C#, Java, Go
- **Frameworks & Runtimes:** Node.js, NestJS, Express.js, Bun, ASP.NET Core, Spring Boot, Go Fiber
- **Databases:** PostgreSQL, MySQL, Clickhouse, MongoDB
- **Messaging & Caching:** Redis, RabbitMQ, Firebase Cloud Messaging
- **Authentication & Security:** Keycloak, LDAP, OAuth2, JWT
- **Infrastructure & DevOps:** Google Cloud Platform (GCP), Docker, Kubernetes, CI/CD (GitHub Actions / GitLab CI)
- **Architecture & Patterns:** Microservices, Event-Driven Architecture, Domain-Driven Design (DDD), CQRS, RESTful APIs

PROFESSIONAL EXPERIENCE

Backend Engineer | PT. Neural Technologies Indonesia | Nov 2023 – Present
Key Achievements:

- **Led the backend architecture and delivery** for **3** phases of the Benchmark Solution Service, managing **2** engineers and **4** interns. Engineered core APIs powering **7+** enterprise dashboards across 30+ regions, including Ookla, OpenSignal, and a **Phase 3 Seamless Analysis** module tracking user transitions between mobile and fixed-line networks.
- **Architected** a comprehensive **User Access Management (UAM)** service seamlessly integrated with Apache **Superset** and **Keycloak**. Established centralized approval/rejection workflows and secure role-based access **utilized across all dashboards throughout the 3 project phases.** Independently configured **Nginx reverse proxies** and managed the complete deployment pipelines to ensure highly available services across all three phases.
- **Led the architectural migration** of the Open Signal Winning Benchmark service **from Node.js to .NET 8, slashing API latency from 10s to 0.5s (a 95% performance increase)**. Optimized the processing of massive Fixed Broadband (FBB) monitoring data to simultaneously aggregate and deliver **15+ primary metrics and 20+ sub-metrics** in real-time.
- Developed core backend services for **RTE 5G Insight and SOC Smartcare** to support real-time network monitoring across high-volume telco systems.

Freelance Backend Engineer | PT. Partner Transformasi Informatika | Nov 2025 – Mar 2026
Key Achievements:

- Architected and developed robust backend APIs for the Selatour Umrah platform, leveraging modern tech stacks including Bun, NestJS, and Supabase Self-Hosted.
- Delivered the platform MVP within a strict 4-month timeline, successfully enabling comprehensive admin management and seamless mobile booking workflows for the initial product launch.

Freelance Backend Engineer | PT. Inti Teknologi Bersama (blimobil.id) | Oct 2023 – Dec 2023
Key Achievements:

- Directed the backend architecture utilizing **NestJS and TypeScript**, reducing system complexity and improving team development efficiency through a **modular service architecture**.
- Implemented the core backend engine and relational database for a **vehicle trading and spare parts marketplace**, accelerating product delivery by **completing the MVP within 2 months**.

Backend Engineer | KMPlus Consulting | Jul 2022 – Oct 2023
Key Achievements:

- Engineered the backend architecture for a **Spotlight-like Search Engine Service** using NestJS and TypeScript, significantly **enhancing search response performance** and indexing efficiency for large datasets.
- Improved overall system scalability by decoupling monolithic backend functionalities into **independently managed macro-service modules**.
- Owned the end-to-end backend development for a **talent and learning management platform serving 2,000+ active users**, ensuring highly reliable data delivery to support modern UI/UX standards.

Backend Engineer Intern | KMPlus Consulting | Apr 2022 – Jul 2022
Key Contributions:

- Developed Repository Services and **strategically redesigned the database schema** for Knowledge Management System (KMS) applications.
- Minimized database query overhead and **improved media retrieval performance** through advanced schema optimization and efficient data querying techniques.

Backend Javascript Student (February 2022 – July 2022)
Binar Academy by Kampus Merdeka Study Independent | GPA 4.6 / 5.0
Key Accomplishments:

- Built and deployed the backend for a second-hand marketplace platform (View Project), developing RESTful APIs with Node.js, Express.js, Sequelize, and PostgreSQL, including authentication and profile management, and deploying on Heroku.

CERTIFICATIONS & ACHIEVEMENTS

- Achieved “Problem Solving, and REST API (Intermediate), also C# (Basic)” certifications on HackerRank in 2024.
- Attained “SQL (Intermediate)” certification on HackerRank in 2023.
- Gained “SQL, JavaScript, Python, and Problem Solving (Basic)” certifications on HackerRank in 2022.
- Received a Certificate of Completion and Assessment for the "Certified Independent Study – Kampus Merdeka Program" program at Binar Academy Wave 2 in 2022.

PROFESSIONAL PROJECTS

Benchmark Solution Service (PT. Neural Technologies)
Technologies: C#, ASP.NET 8 Core, Elasticsearch, PostgreSQL, RESTful APIs, Telco Analytics

- Architected the core backend and centralized **User Access Management (UAM)** for an enterprise telco analytics suite, powering **7+ interactive dashboards** across 30+ regions.
- Led the system migration from **Node.js to .NET 8**, optimizing massive Fixed Broadband (FBB) data aggregation to **slash API latency from 10s to 0.5s (a 95% performance increase)**.
- Engineered the **Phase 3 Seamless Analysis** module, building APIs to track and calculate complex user transition patterns between mobile and fixed-line networks.

Portaverse Platform (KMPlus Consulting)
Technologies: TypeScript, NestJS, Express.js, Javascript, MySQL, System Design, RESTful APIs

- Architected an **Enterprise Learning Management System (LMS) from scratch**, benchmarking platforms like Udemy and Coursera.
- Designed complex database structures to support video progress tracking, gamification (learning points), and **dynamic group learning workflows**.
- Engineered a **360-Degree Talent Assessment backend** to process multi-rater feedback. Successfully resolved complex architectural edge cases involving **asynchronous evaluation timelines and dynamic organizational chart alignments** during active division changes.

Selatour Umrah Platform (PT. Partner Transformasi Informatika)
Technologies: Bun, NestJS, PostgreSQL, Self-hosted Supabase, RESTful APIs

- Architected and developed **robust backend APIs** to support complex admin management and seamless mobile booking workflows.
- Successfully delivered the **platform MVP within a strict 3-month timeline**, enabling a smooth initial product launch.

blimobil.id Vehicle Marketplace (PT. Inti Teknologi Bersama)
Technologies: Node.js, NestJS, TypeScript, PostgreSQL, Modular Architecture

- Directed the core backend architecture for a comprehensive **vehicle trading and spare parts marketplace**.
- Accelerated product delivery by building the core backend engine and relational database schema, successfully **completing the MVP within just 2 months**.

ADDITIONAL SKILLS

Core Competencies: Technical Leadership, Architectural Problem-Solving, Cross-Functional Collaboration, Agile Mentorship
Languages: Indonesian (Native), English (Professional Working Proficiency), Korean (Elementary)
Interests: Advanced Backend Patterns, Multi-Agent AI Frameworks, Tech Community Involvement
