SUMMARY

Backend Engineer with 4+ years of experience building scalable backend systems using NestJS, ASP.NET Core, Spring Boot, and Go Fiber. Skilled in API development, database design, authentication, and cloud-native deployment on GCP. Experienced in building real-time dashboards, telco analytics platforms, and SaaS applications with focus on performance optimization, maintainability, and scalable architecture.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Node.js, Bun, C#, Java, Rust, Go, Python
- **Backend:** NestJS, .Net, Express.js, Spring Boot, Fiber, Axum, Rocket Rust, FastAPI
- **Databases:** PostgreSQL, MySQL, MongoDB
- **Infrastructure & DevOps:** GCP, Docker, Kubernetes, Git
- **Messaging & Caching:** Redis, RabbitMQ
- **Authentication & Security:** Keycloak, OAuth2, JWT

PROFESSIONAL EXPERIENCE

Backend Engineer (November 2023 – Present)

PT. Neural Technologies Indonesia, Indonesia.

Key Achievements:

- Led backend architecture and development for Phase 2 of the Benchmark Solution Service, managing 2 backend engineers and mentoring 4 interns. Built APIs for Ookla & OpenSignal dashboards, Interactive Maps, Activity Tracking systems and 3 more dashboards used for telco benchmark analytics across 30+ regions in Indonesia.
- Developed backend services for RTE 5G Insight, Smartcare SOC, and 5G Auto Provisioning platforms also supported real-time 4G/5G event monitoring and nationwide network visualization across multiple telco systems.
- Integrated Keycloak with LDAP authentication and managed backend delivery for dashboard and monitoring services also Elasticsearch logging to capture user activity and monitor network KPIs such as latency, speed, and reliability.
- Mentored 4 interns and improved backend performance by optimizing SQL queries and reducing API response time for high-volume dashboard services.

Backend Engineer (Freelance) (November 2025 – March 2026)

PT. Partner Transformasi Informatika, Indonesia.

Key Achievements:

- Architected and developed scalable backend APIs for the Selatour Umrah platform using Bun, NestJS, and Supabase Self Hosted.
- Developed the platform MVP within 3 months, enabling admin management and mobile booking workflows for the initial product launch.

Backend Engineer (Freelance) (October 2023 – December 2023)

PT. Inti Teknologi Bersama, Indonesia.

Key Achievements:

- Directed backend architecture with NestJS (TypeScript), reducing backend complexity and improving development efficiency through modular service architecture.
- Implemented core backend and database for blimobil.id, building vehicle trading and spare parts marketplace services and completing the majority of the MVP within 2 months.

Backend Engineer (July 2022 – October 2023)

KMPlus Consulting, Indonesia.

Key Achievements:

- Improving scalability by separating backend functionality called macro services into independently managed service modules..
- Owned backend development for a talent & learning platform used by 2,000+ users, aligning performance with modern UI/UX standards.
- Engineered backend architecture for a Search Engine Service (Spotlight-like), leveraging NestJS & TypeScript for improving search response performance and indexing efficiency for large datasets.

Backend Engineer Intern (April 2022 - July 2022)

KMPlus Consulting, Indonesia.

Key Contributions:

- Developed Repository Services and redesigned the database schema for KMS Applications, reducing query overhead and improving media retrieval performance through database schema redesign.

Backend Javascript Student (February 2022 – July 2022)

Binar Academy by Kampus Merdeka Study Independent | GPA 4.6 / 5.0

Key Accomplishments:

- Built and deployed the backend for a second-hand marketplace platform ([View Project](#)), developing RESTful APIs with Node.js, Express.js, Sequelize, and PostgreSQL, including authentication and profile management, and deploying on Heroku.

PROJECTS

- **iNics – Healthcare SaaS Platform:** Built a multi-tenant healthcare SaaS platform for hospital and patient management using NestJS, PostgreSQL, and GCP, including role-based access control and scalable API architecture
- **Habit Tracker App:** Developing a high-performance habit tracking backend using Rust, Axum and PostgreSQL, focusing on clean architecture, concurrency, and efficient data handling.

EDUCATION

University of Muhammadiyah Prof. Dr. Hamka, Jakarta, Indonesia

Informatics Engineering | GPA 3.69 / 4.00

CERTIFICATIONS & ACHIEVEMENTS

- Achieved "Problem Solving, and REST API (Intermediate), also C# (Basic)" certifications on HackerRank in 2024.
- Attained "SQL (Intermediate)" certification on HackerRank in 2023.
- Gained "SQL, JavaScript, Python, and Problem Solving (Basic)" certifications on HackerRank in 2022.
- Received a Certificate of Completion and Assessment for the "Certified Independent Study – Kampus Merdeka Program" program at Binar Academy Wave 2 in 2022.
